

HYMENOPTHORTMULTRA

GRANULAR ANT AND COCKROACH BAIT

TARGET ACQUISITION :
AMERICAN COCKROACHES & NYMPHS
GERMAN COCKROACHES & NYMPHS
ALL SPECIES OF ANTS

MULTI-MISSION FIGHTER :
ELIMINATE ALL SPECIES
OF ANTS AND COCKROACHES

**REQUIRED
SKILLS :**
ULTRA STRONG
ULTRA FAST
ULTRA PALATABLE
STEALTH

APPLICATION :
COVERT OPERATION.
ENEMY MUST BE UNAWARE
OF YOUR PRESENCE

**TARGETED TO KILL
ALL SPECIES OF ANTS AND COCKROACHES,
INCLUDING NYMPHAL STAGES!**

ARMED WITH FIPRONIL

HYMENOPTHOR ULTRA™

GRANULAR ANT AND COCKROACH BAIT

HYMENOPTHOR ULTRA is an elite force uniquely formulated with Ensystem's Advanced Bait Technology™. Designed to implement complex multi-kill missions other products are incapable of achieving.

MULTI MISSION FIGHTER

PERIPLANETA SPP (LARGE)
COCKROACHES & NYMPHS

GERMAN COCKROACHES
& NYMPHS

WIDE RANGE OF ANT SPECIES

ELITE UNIT

HYMENOPTHOR ULTRA is an elite blend of proteins, oils and sugars - advanced technology brought together to form an ULTRA fighting force.

EFFICIENT DOSES

You don't need to send in an army of products to get the results that HYMENOPTHOR ULTRA can achieve with its highly targeted, low dose bait.

HYMENOPTHOR™ ULTRA WILL PROTECT YOU INDOORS AND OUT

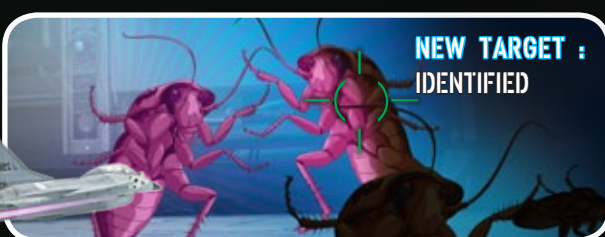

HYMENOPTHOR™ ULTRA NEXTGEN TECHNOLOGY

HYMENOPTHOR ULTRA is another market first from ENSYSTEEX, a next generation technology granular ant and cockroach bait that has been uniquely formulated using our Advanced Bait Technology™ to produce a complex blend of proteins, oils and sugars that is targeted to eliminate the widest range of ant species, as well as all species of pest cockroaches, including nymphal stages!

HYMENOPTHOR ULTRA™ is only available to licensed, professional pest control companies to ensure you get the best results.

HYMENOPTHOR™ ULTRA OPTIMISED WITH FIPRONIL

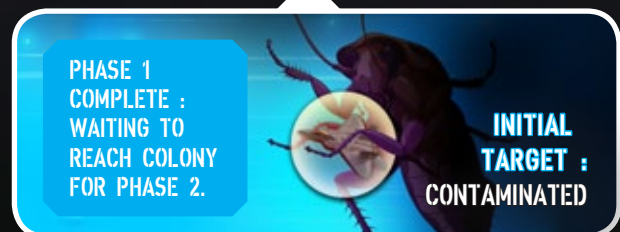

HYMENOPTHOR ULTRA has been optimised with just 0.1 g/Kg fipronil, so you can expect to see the ants walk away with the bait within minutes of placement. Our Advanced Bait Technology™ then ensures the fipronil is made available through Liquid Oil Phase Release™ for optimal feeding. This is important since ants are primarily liquid feeders. The low level of fipronil also ensures the ants are not killed too quickly, so the fipronil is spread through the colony to provide total elimination.

HYMENOPTHOR™ ULTRA LIQUID OIL PHASE RELEASE™

HYMENOPTHOR ULTRA's efficacy is enhanced by the ant's feeding behaviour. Worker ants are generally liquid feeders, and cannot ingest solid baits. So they use their legs and mouthparts to physically carry the granules back to the nest for the larvae to digest and feed to the colony.

With liquid or gel baits, the worker ants ingest the bait first, and then pass it through to their nest mates by trophallaxis. This means the toxicant is diluted as it is passed from one ant to the next. In contrast there is no dilution of the HYMENOPTHOR ULTRA when it is taken back to the nest. More importantly, Liquid Oil Phase Release™ technology ensures that the workers are also able to feed directly on the HYMENOPTHOR ULTRA, and receive a toxic dose of the active; as well as feeding on the pre-digested liquid from the larvae.

HYMENOPTHOR™ ULTRA VIRAL FEED THROUGH EFFECT™

Undetectable to the target insects, fipronil is stealthily passed from insect to insect through a transference technology known as the Viral Feed Through Effect™, which helps ensure colony kill of ants and cockroaches.

HYMENOPHTHOR ULTRA™

GRANULAR ANT AND COCKROACH BAIT

HYMENOPHTHOR ULTRA™ ULTRA FIGHTING UNIT

ULTRA EFFICIENT

The high palatability of the HYMENOPHTHOR ULTRA combined with the Liquid Oil Phase Release™ of the fipronil also results in fast kill of cockroaches, including the large cockroach species (*Periplaneta* spp). In fact during a rigorous trials program conducted by the South African Bureau of Standards (SABS) we recorded results better than Gel Baits containing 5x as much fipronil.

ULTRA STRONG

Performance was particularly spectacular when targeting cockroach nymphal stages, the most difficult life-stage to control. This is actually amazing since the bait contains one fifth the fipronil of a gel, yet works better, which highlights the high palatability.

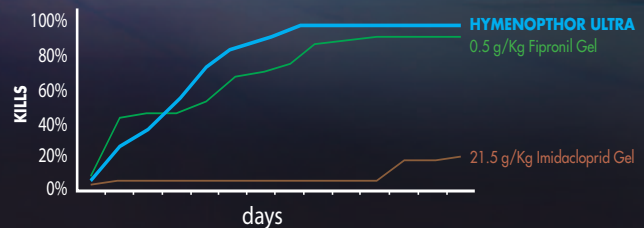

ULTRA EFFECTIVE

HYMENOPHTHOR ULTRA is uniquely effective in the control of German cockroaches. Studies published in the scientific literature show that German cockroaches have an exceptionally high preference for solid foods, especially the small and medium sized nymphs, with bread ranking higher than most cockroach gels. HYMENOPHTHOR ULTRA exploits this, with German cockroaches readily and aggressively feeding on the food-grade cereal base used in HYMENOPHTHOR ULTRA. In fact, trials conducted by the South African Bureau of Standards (SABS) showed HYMENOPHTHOR ULTRA worked faster than gel cockroach baits to eliminate the cockroach populations.

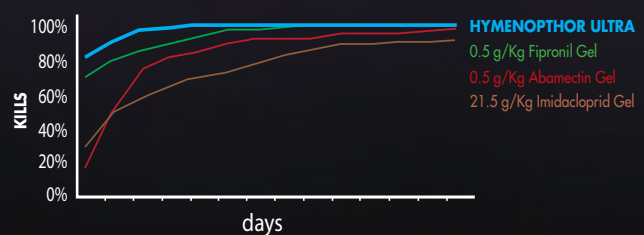

HYMENOPHTHOR ULTRA™ PROVEN PERFORMANCE

Results on cockroaches reflect the high preference cockroaches show for a solid bait matrix. And the unique palatability of HYMENOPHTHOR ULTRA provides for very high levels of feeding, hence the incredible results.

AMERICAN COCKROACHES - NYMPHS

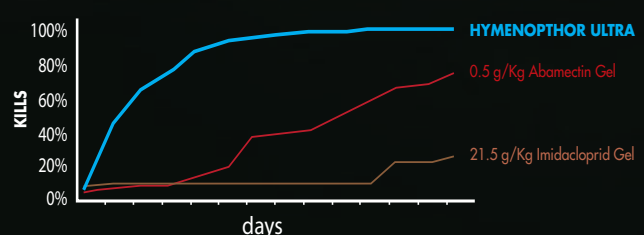

AMERICAN COCKROACHES - ALL

HYMENOPHTHOR ULTRA was also effective when dealing with German cockroaches (*Blattella germanica*), thus allowing you to control this difficult pest species too.

GERMAN COCKROACHES - ALL

ARMED WITH FIPRONIL

Our **STEALTH FIGHTER**, attacking three different target sites in insects, fipronil provides the highest potency whilst remaining totally undetectable.

HIGH PALATABILITY

With a complex blend of several oils, proteins and sugars, you can be sure it provides a gourmet meal for ants and cockroaches.

YEARS OF TRAINING

HYMENOPHOTHOR ULTRA is the accumulation of years of development and trials. Only the very best technology has been placed into one proven product.

VIRAL FEED THROUGH EFFECT™

HYMENOPHOTHOR ULTRA attacks more than individual targets, creating rapid spread through ant colonies & cockroach populations.

LIQUID OIL PHASE RELEASE™

Ensures uptake of the fipronil by ants and produces results equal to those of Gel Baits for cockroaches - including nymphal stages.

AND ARMED DEADLY

HYMENOPHOTHOR ULTRA™ EASY TO APPLY

Sprinkle evenly in areas where ants are tracking. For best results apply when ants are most active, usually late afternoon. **HYMENOPHOTHOR ULTRA** can also be applied by sprinkling around ant mounds. For best results do not apply directly to the mound, nor disturb the ants or mound.

Indoor application is limited to inaccessible areas such as cracks and crevices, wall voids and crawl spaces in commercial and residential areas. Remember to remove any loose or excess granules.

It can also be placed in Ant or Cockroach Bait Stations available from Ensystemx.

For *Periplaneta* spp (large) cockroaches, **HYMENOPHOTHOR ULTRA** is a great solution when applied around manholes, grease traps and similar areas where these large cockroaches harbour.

LOCATION IDENTIFIED :
KNOWN ENEMY HARBOURAGE
FOR LARGE COCKROACHES.
HYMENOPHOTHOR ULTRA
POSITIONED
AND READY
TO KILL.

ALWAYS READ THE PRODUCT LABEL BEFORE USE
FOR COMPLETE INSTRUCTIONS.

**HYMENOPHOTHOR ULTRA CAN ALSO BE SECURED
