DIRECTIONS FOR USE

Use only as directed.

MAXXTHOR™ TURBO Fast Action Insecticide is a powerful knockdown and residual pesticide. Ants, bedbugs, cockroaches, fleas, flies and mosquitoes are controlled by direct contact with the spray and also by the residual action as they come into contact with treated surfaces.

Apply at rates recommended on leaflet. Do not apply at rates lower than indicated.

Mixing instructions

Prior to mixing, shake container thoroughly.
Premix the required quantity of **MAXXTHOR™ TURBO Fast Action Insecticide** with a small amount of water in a clean bucket.
Fill the spray tank half with water and add the premixed **MAXXTHOR™ TURBO Fast Action Insecticide**. Fill the spray tank with water to the required volume.
Agitate the contents of the spray tank.
Do not store prepared mixture.

WARNINGS

- Handle with care.
- Harmful when swallowed.
- An eye and skin irritant.
- Toxic to bees, fish, other aquatic invertebrates and harmful to other animals.
- Store in closed original container in a dry, cool, well ventilated area out of direct sunlight and away from food and feedstuffs.
- Keep out of reach of children, uninformed persons and animals.
- Do not spray directly on humans, pets or animals or onto surfaces where uncovered food is stored or food is prepared.
- Do not apply **MAXXTHOR™ TURBO Water-based insecticide** when pets, their bedding or housing has been treated with any other pesticide.
- **In case of poisoning call a doctor and make this label available to him.**

PRECAUTIONS

- Avoid contact with eyes and skin and do not inhale fumes of spray mist.
- Wear protective clothing: appropriate gloves and boots and face shield when handling the concentrate and protective gloves and boots, respirator and face shield during application.
- Do not eat drink or smoke whilst applying or mixing or before washing hands and face and change of clothing.
- Wash contaminated clothing daily.
- Do not use in the presence of persons with known sensitivity to pyrethroids.
- In case of signs of sensitivity, obtain medical advice.
- Wash hands and face with soap and water after handling. In case of accidental contact with skin wash affected area immediately with plenty of soap and water.
- In case of accidental contact with eyes, rinse immediately with clean water for at least 15 minutes and obtain medical advice.
- Remove pets and aquaria from area where this pesticide will be applied.
- Prevent contamination of rivers, dams and areas not under treatment.
- Clean application equipment thoroughly after use and dispose of wash water where it will not contaminate crops, grazing, rivers or dams.

- Triple rinse empty container in the following manner: Invert the empty container over the spray or mixing tank and allow to drain for at least 30 seconds after the flow has slowed down to a drip. Thereafter rinse the container three times with a volume of water equal to a minimum of 10% of that of the container. Add the rinsings to the contents of the spray tank before destroying the container in the prescribed manner.
- Destroy empty container by perforation and flattening and never use for any other purpose.
- Prevent contamination of food, feeds, eating utensils and drinking water.

SYMPTOMS OF POISONING

Overexposure may lead to bleeding from the nose, tremors and convulsions, incoordination, salivation, vomiting, diarrhea, and irritability to sound and touch. Skin contact may produce sensations such as numbing, burning and tingling.

FIRST AID TREATMENT

- **Skin contact:** Irritation is unlikely. However, if irritation does occur, flush with lukewarm, gently flowing water for 5 minutes or until chemical is removed. If in doubt obtain medical advice.
- **Eye contact:** No effects expected. If irritation does occur, flush contaminated eye(s) with lukewarm, gently flowing water for 5 minutes or until the product is removed. Obtain medical advice if irritation becomes painful or lasts more than a few minutes.
- **Ingestion:** Do not induce vomiting. Wash mouth with water and contact a Poisons Information Centre, or call a doctor.
- **Inhaled:** No first aid measures normally required. However, if inhalation has occurred, and irritation has developed, remove to fresh air and observe until recovered. If irritation becomes painful or persists more than about 30 minutes, seek medical advice.

NOTE TO PHYSICIAN

There is no known antidote known for acute poisoning. Treat symptomatically with supportive care.

NOTE

Ensysrex South Africa (Ensysrex) warrants that this product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with Directions for Use under normal conditions of use.
