BLATTATHOR™ ULTRA
GEL COCKROACH BAIT

WARNINGS

- Handle with care.
- Harmful when swallowed.
- A mild eye irritant.
- Harmful to fish and other animals.
- Store in closed original container in a dry, cool, well ventilated area out of direct sunlight and away from food and feedstuffs.
- Keep out of reach of children, uninformed persons and animals.

PRECAUTIONS

- Avoid contact with eyes and skin.
- Wear protective clothing when handling.
- Wash hands after handling.
- DO NOT dispose of undiluted chemical on site.
- DO NOT contaminate streams, rivers or waterways with this product or used containers.
- Destroy empty container by perforation and flattening and never use for any other purpose. Dispose in a responsible manner and according to local legislation.
- DO NOT burn empty containers.
- DO NOT apply to surfaces where food is handled or stored or allow product to directly come in contact with humans, pets, exposed food, food preparation areas or food utensils.
- Prevent contamination of food, feeds, eating utensils and drinking water.
- Apply bait where it is inaccessible to children and animals.
- Return plastic tube to outer (carton) container after use.

DIRECTIONS FOR USE Use only as directed.

BLATTATHOR™ ULTRA GEL COCKROACH BAIT is recommended for the control of cockroaches in commercial, industrial locations including food handling and food processing areas, and residential premises.

TREATMENT

- Inspect premises thoroughly and locate all cockroach harbourages.
- Place **BLATTATHOR™ ULTRA GEL COCKROACH BAIT** bait spots as close as possible to cockroach harbourages.
- Place bait spots into cracks and crevices away from where they are likely to be removed by cleaning programmes.
- When placing baits remember that the label refers to the full surface area that the cockroaches are likely to traverse e.g. in a kitchen allow for the full surface area of each bench, cupboard, etc.
- Good hygiene is essential in any pest management situation. Encourage the removal of other food materials.
- DO NOT use chemical sprays near baits.
- DO NOT apply to surfaces which are wet or to areas that are washed.
- In areas of poor sanitisation use more bait placements.

DOSAGE RATE

Apply as a 2 to 4 mm diameter bait spot. Use the larger bait spot for control of the American cockroach. Apply 12 to 24 bait spots for a 30 m² treatment area for heavy infestations and 4 to 6 bait spots to a 30 m² treatment area for light infestations.

RE-TREATMENT

- In areas of high activity the bait may be consumed and further bait placements needed. Schedule a second inspection about a month after the initial treatment.
- Re-treatments only need to be applied in areas where cockroaches remain or are likely to enter a premise.
- **BLATTATHOR™ ULTRA GEL COCKROACH BAIT** is stable; it does not harden or lose its attractiveness to cockroaches. Only reapply baits when the original bait has been consumed.
