

# CABLE BIRD®

System of dual-action rotary and spring rods to prevent pigeons from settling on building ledges. Recommended for low bird pressures.

## • Action

The dual action of **CABLE BIRD®** rods prevents pigeons from settling on buildings ledges. When the bird attempts to land, the rod rotates (SEL patent) and vibrates with a spring effect. The vibrations of the rod prevent the bird from settling.

## • Protection

- Cornices
- Guardrails
- Gutters
- Handrails

## • Description

**Steelinox®** rod system (SEL Product and Brand) fitted on UV-stabilised polycarbonate supports that are stuck to the surface to be protected.

To increase protection, supports can be single or double, holding one or two rods.

## • Fitting

**CABLE BIRD®** can be fitted to all types of supports (zinc, wood, stone...).

Very fast using neutral silicone adhesive (adhesion : 5,2 kg per cm<sup>2</sup>).

Recommendation for optimised gluing : **Selfixing®** silicone adhesive.

## • Main advantages

- Very fast fitting
- Dual-action for guaranteed results
- Discreet
- Harmless
- Good value
- Support fitted with no grilling
