

ID384 ENSYSTEX South Africa ATTRATHOR 250ml booklet REV-202205-1-1-1  
booklet

**ENSYSTEX®**

**HAZARD STATEMENT:**  
H373: May cause damage to organs through prolonged or repeated exposure.  
H410: Very toxic to aquatic life with long lasting effects.

**DISCLAIMER**  
Ensystex South Africa (Ensystex) warrants that this product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with Directions for Use under normal conditions of use. No warranty of merchantability or fitness for a particular purpose, expressed or implied, extends to the use of the product contrary to label instructions or under abnormal conditions.

**PREVENTION**  
P102: Keep out of reach of children.  
P260: Do not breathe fumes, mists, vapours or spray.  
P281: Use personal protective equipment as required.

**RESPONSE**  
P314: Get medical advice or attention if you feel unwell.  
P352: Wash with plenty of soap and water.  
P301+P330+P331: IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.  
P332+P313: If skin irritation occurs: Get medical advice.  
P337+P313: If eye irritation persists: Get medical advice.  
P391: Collect spillage.  
P270+P273: Not combustible. Use extinguishing media suited to burning materials. Alcohol resistant foam is the preferred firefighting medium but, if it is not available, normal foam can be used.

**STORAGE**  
P402+P404: Store in a dry place. Store in a closed container.  
P410+P403: Protect from sunlight. Store in a well-ventilated place.

**DISPOSAL**

**TRIPLE RINSE THE EMPTY CONTAINER AS FOLLOWS:** Invert the empty container over the spray or mixing tank and drain for at least 30 seconds after the flow has slowed down to dripping. Thereafter rinse the empty container three times in succession with one quarter of the container volume fresh water and decant the rinsate into the spray or mixing tank. Puncture the triple rinsed container and dispose of via an approved collector or recycler ([www.croplife.co.za](http://www.croplife.co.za)). Do not bury, burn or donate the container to any other parties that may use it as a container for food or beverages.  
P501: If they cannot be recycled, dispose of contents to an approved waste disposal plant and containers to landfill

**FIRST AID**

**Inhalation:** No first aid measures normally required. However, if inhalation has occurred, and irritation has developed, remove to fresh air and observe until recovered. If irritation becomes painful or persists more than about 30 minutes, seek medical advice.

**Skin Contact:** Wash gently and thoroughly with water for 5 minutes or until chemical is removed.

**Eye Contact:** Flush contaminated eye(s) with lukewarm, gently flowing water for 5 minutes. Obtain medical advice if irritation becomes painful or lasts more than a few minutes. Take special care if exposed person is wearing contact lenses.

**Ingestion:** Do NOT induce vomiting; wash mouth with water and give some water to drink. If symptoms develop, or if in doubt contact a Poisons Centre or a doctor.

**DIRECTIONS FOR USE**

Use only as directed.

**MIXING INSTRUCTIONS**

Invert the **ATTRATHOR™ Targeted Insecticide** container several times to ensure thorough mixing of concentrate. Half fill the spray tank with clean water and then add the required quantity of **ATTRATHOR™ Targeted Insecticide**. Stir mixture and then top up the spray tank to the required volume with clean water. The use of this product in a tank mix with other insecticides is not recommended as the behaviour and efficacy of the product may be affected. Ensure equipment is clean

SITUATION	PEST	RATE	CRITICAL COMMENTS
Commercial, industrial and residential premises including hospitals, hotels, and food preparation areas	Cockroaches	50 or 100 mL per 5 L water per 100 square meter treatment area	Use the lower dosage rate for low to moderate infestations and re-treatments on non-absorbent surfaces. Use the higher dosage rate in situations where pest pressure is high on absorbent surfaces, or where the infestation occurs in inaccessible areas such as in walls. Insecticide placement should be at harbourages and aggregation areas such as corners, areas of movement or cracks and crevices. Numerous smaller placements will provide faster control than fewer larger spots especially for German cockroach control. Apply to skirting boards, floors and carpets, behind sinks, stoves, and pipes paying particular attention to all cracks and crevices which might contain insects. Apply to all areas where insects are seen, and known harbourages.

**GENERAL INSTRUCTIONS**

**ATTRATHOR™ Targeted Insecticide** is recommended for use as a targeted indoor crack and crevice treatment for cockroaches. It can be used in warehouses, restaurants, food manufacturing, processing and storage plants, supermarkets, hotels, hospitals, domestic and other similar situations.
