WARNINGS

Handle with care.
Harmful when swallowed.
A mild eye irritant.
Harmful to fish and other animals.
Store in the closed, original container in a dry, cool, well-ventilated area out of direct sunlight and away from food and feedstuffs.
Keep out of reach of children, uninformed persons and animals.

PRECAUTIONS

Avoid contact with eyes.
Wash hands after handling.
DO NOT dispose of undiluted chemical on site.
DO NOT contaminate streams, rivers or waterways with this product or used containers.
Destroy empty container by perforation or flattening and do not use for any other purpose. Dispose in a responsible manner and according to local legislation.
DO NOT burn empty containers.
Prevent contamination of food, feed, eating utensils and drinking water.
Apply bait where it is inaccessible to children and animals.
Return plastic vial to outer (carton) container after use.

DIRECTIONS FOR USE

Use only as directed.

MAGNATHOR MAGNETIC COCKROACH BAIT WITH MAGTHANITE

is recommended for the control of cockroaches in food-handling and food-processing, commercial, industrial and residential premises, ships and aircraft.

TREATMENT

Inspect premises thoroughly and locate all cockroach harbourages. Place product as close as possible to cockroach harbourages. Place product into cracks and crevices away from where they are likely to be removed by cleaning programmes. When placing product remember that the label refers to the full surface area that the cockroaches are likely to traverse e.g. in a kitchen allow for the full surface area of each bench, cupboard etc. Good hygiene is essential in any pest management situation. Encourage the removal of other food materials.
DO NOT use chemical sprays near product.

DO NOT apply to a ground or surfaces which are wet or to areas that are washed.
In areas of poor sanitation use more product.
Apply very lightly into cracks and crevices where insects are known or are likely to be harbouring.

DOSAGE RATE

For light infestations, a minimum of 4 - 6 bait points is recommended per 10 m² of treatment area.
For heavy infestations, a minimum of 12 - 24 bait points is recommended per m² of treatment area.
A product bait placement is typically about 0.05 g to 0.1 g of product.

RE-TREATMENT

In areas of high cockroach activity further placements may be needed. Schedule a second inspection about a month after the initial treatment. Retreatments only need to be applied in areas where cockroaches remain or are likely to enter a premise.

NOTICE

Ensyxest South Africa warrants that this product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with Directions for Use under normal conditions of use. No warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use of the product contrary to label instructions or under off-label permits not endorsed by Ensyxest, or under abnormal conditions.
