ENSYSTEX

WARNINGS

Handle with Care. Poisonous by swallowing and inhalation. May cause irritation of the skin, eye, mucous membrane and skin sensitization. Very toxic to fish and toxic to bees. Combustible – Keep away from open flames or source of heat. Store in the closed, original container in a dry, cool well-ventilated area out of direct sunlight, food, feed and water. Keep out of the reach of children, uninformed persons and animals. This product may stain some household appliances, cover before fumigation.

PRECAUTIONS

DO NOT inhale vapour or smoke. Leave area immediately after lighting smoke generators. Thoroughly ventilate treated areas before re-occupying. Do not eat, drink or smoke whilst handling this product. Do not use in the presence of persons with known sensitivity to pyrethroids. In case of signs of sensitivity, obtain medical advice. DO NOT use in premises when people, pets, and animals or food producing animals are present. Thus, let all people vacate the area to be treated and remove pets and other animals. Do not contaminate food, feed, eating utensils or drinking water. Remove or cover exposed food, eating utensils, food processing areas, pet bowls and fish tanks and aquariums prior to use of this product. Aerators should be turned off while the product is in use and while the aquarium is covered.

Keep package well closed. Vacate premises during treatment and ensure thorough ventilation (3-4 hours) before re-occupation.

DO NOT apply where smoke detectors are installed, or turn them off prior to the use of smoke generators. Remove all RAYON and all other ARTIFICIAL SILK and SILK fabrics (clothing, curtains, drapes, etc.) from the area to be treated as discolouration may result. DO NOT contaminate streams, rivers or waterways with the chemical or used containers. Dispose of used smoke generator safely, wrap empty generator in paper and place in waste bin. DO NOT re-use.

SYMPTOMS OF POISONING

Hypersensitivity, tremors, muscular fibrillation, salivation, in co-ordination, incontinence, and lacrimation, rapid and/or irregular respiration.

FIRST AID TREATMENT

Remove patient from source of poisoning and keep patient quiet and reassured. Remove contaminated clothing and rinse contaminated body area thoroughly with plenty of soap and cold water. Do not rub skin. Flush contaminated eyes with clean water for 15 minutes or longer. If poisoning occurs, contact a doctor or the Poisons Information Centre.

NOTE TO PHYSICIAN

There is not known antidote. Treat symptomatically with supportive care.

DIRECTIONS FOR USE
Use only as indicated.

| Situations | Pests Controlled | Rate | Critical Comments |
|--|--|---------------------------------|---|
| Commercial, industrial, agricultural, domestic and public services buildings | Ants, cockroaches, fleas, flies, mosquitoes, hide beetles, fish moths (silverfish), bed bugs, stored product insects, carpet beetles, clothes moths. | 1 generator/ 250 m ³ | Refer to "General Instructions" before using this product. Insects active at the time of smoke release will be controlled, but those hatching from eggs, immigrant insects or storage insects emerging from commodity residues may not be controlled. |
| Glasshouses ornamentals only | Ants, cockroaches, fleas, flies, mosquitoes, fish moths (silverfish) | 1 generator/ 500 m ³ | Refer to "General Instructions" before using this product. If pest populations are heavy, a second smoke release 2 to 3 days later may be required to reduce the pest populations to an acceptable level. For best results use late in the evening leaving treated areas closed-up overnight. |
| Agricultural buildings and animal housing | Flies, mosquitoes. | | |
