

DIRECTIONS FOR USE

RODENTHOR Monitor Blocks are a 25 g non-toxic extruded wax block bait for monitoring in sensitive areas. The product retains its attractiveness in damp locations and is enriched with highly palatable ingredients.

Thanks to its hole in the middle, it can be fixed in manholes above the water level, while its irregular and sharp-cornered form increases its palatability.

AREAS OF USE

RODENTHOR Monitor Blocks can be used in food industries, in the storage and conservation of foodstuffs, schools, hospitals and in any place where, HACCP systems are in place.

APPLICATION RATE

Baits should be placed in stations or otherwise secured. Place baits around the periphery of buildings, inspect routinely and replace spoiled baits.

STORAGE AND DISPOSAL

Store in the closed original container in a cool, well ventilated area. DO NOT store for prolonged periods in direct sunlight. Dispose of empty containers with normal household or industrial waste.

NOTICE

Ensystem warrants that this product conforms to its description and is reasonably fit for the purposes stated on the label when used in accordance with directions for use under normal conditions of use. No warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use of the product contrary to label instructions, or under abnormal conditions.
