Cones in Trap

2

Drop 2 FLY-FREE
GRANULE sachets
into the Trap

3

Add water

4

100-150 cm

Hang/ place
in position

FLY-FREE water-soluble sachets dissolve in the water in the FLY-FREE Trap to attract most common species of nuisance flies including house flies (*Musca domestica*), flesh flies (*Sarcophaga spp*), blow flies (*Calliphoridae* family), lesser house flies (*Fannia canicularis*) and horse flies (*Tabanidae* family).

Flies caught in the Trap are unable to escape.

Ideal for use around Livestock, Domestic, Commercial, Public and Industrial buildings facilities, & structures.

It typically takes 2-5 days for the FLY-FREE TRAP to reach maximum attractiveness.

The FLY-FREE Trap will remain attractive for 30 - 60 days depending on the conditions.

Do not let the liquid inside the FLY-FREE Trap evaporate completely. Add water from time to time and top up to the initial level.

After 30-60 days, safely dispose of the contents and reactivate with FLY-FREE GRANULES and fresh water.

See full directions for use on the label of the FLY-FREE GRANULES.

STORAGE

Keep out of reach of children. Store FLY-FREE GRANULES in the closed, original container in a cool, well-ventilated area. Do NOT store for prolonged periods in direct sunlight.

Contents:

1 x FLY-FREE
TRAP M
2 x 50 g sachets
4 x Unidirectional
