Date of Manufacture:

SITUATION	PEST	DOSAGE RATE	REMARKS
Inside: Commercial, industrial and domestic facilities and animal houses ONLY in areas inaccessible to livestock and domestic animals Under: Animal and poultry cages ONLY in areas inaccessible to livestock	Adult house fly (<i>Musca domestica</i>) and Lesser house fly (<i>Fannia canicularis</i>)	2 g/m ²	Place out of reach of all animals and away from feed. Re-bait dry bait stations as described. Scatter application: The bait should be scattered (do not put in piles) onto dry level surfaces (e.g. pathways, window ledges or in shallow dishes). Avoid very dusty areas. Bait Station application: Set up Stations by sprinkling into shallow tins, lids or similar containers and place where flies congregate. Position Stations out of reach of animals and away from feed troughs, storage or mixing areas. Paint-on application: To prepare a paste for painting, mix 50 g of VECTOTHOR™ Fly Bait with 37.5 mL of water. 15 minutes after mixing the paste can be applied with a brush to spots where flies rest (e.g. walls, joists, window ledges, stable fixtures). Additionally it can be painted onto hessian bags or sheets of cardboard or fabric which are hung in areas frequented by flies. After use the brush can be cleaned with warm water. Spray-on application: To prepare a paste for spraying, mix 10 g of VECTOTHOR™ Fly Bait with 40 mL of water and spray as a coarse spray on to surfaces where flies land at a rate of 1 L per 10m ² . The attractants within VECTOTHOR™ Fly Bait will lure flies to the treated surface where they will attempt to feed; thus picking up a lethal dose. Due to this bait function, only portions of vertical surfaces need to be treated. For areas of 100m ² apply 2 L of spray in bands covering about a third (1/3) of the total surface. Re-baiting: Re-baiting may be necessary in 3-5 days depending on exposure, weather and population density.

ENSYSTEX®

GHS Signal word: None

HAZARD STATEMENT:

H402+H412: Harmful to aquatic life with long lasting effect.

DISCLAIMER

Ensysstex South Africa (Ensysstex) warrants that this product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with Directions for Use under normal conditions of use. No warranty of merchantability or fitness for a particular purpose, expressed or implied, extends to the use of the product contrary to label instructions or under abnormal conditions.

PREVENTION

P102: Keep out of reach of children.

P273: Avoid release to the environment.

STORAGE

P402+P404: Store in a dry place. Store in a closed container.

P403+P235: Store in a well-ventilated place. Keep cool.

Disposal: Shake container empty when completing use and dispose of empty container by wrapping with paper and putting in the garbage.

If recycling empty container, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush or puncture and deliver empty packaging to an approved waste management facility. If an approved waste management facility is not available bury the empty packaging 500 mm below the surface in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots in compliance with relevant Local, State or Territory government regulations. Do not burn empty containers or product.

Do not use empty container for any other purpose.

Do not dispose of undiluted chemicals on site.

Treated sacks, cardboard or fabric may be re-used as necessary.

After use they should be disposed of by wrapping in paper, placing in a plastic bag and putting in the garbage.

PRECAUTIONS

When using the product wear cotton overalls buttoned to the neck and wrist (or equivalent clothing) and rubber gloves.

Wash hands after use.

After each days use wash gloves and contaminated clothing. Do NOT allow contact with raw or processed food, utensils or packaging thus do not apply to surfaces on which food or feed is stored, prepared or eaten.

Do NOT place baits in locations accessible to domestic animals, livestock or birds.

Do NOT contaminate streams, rivers or waterways with the chemical or used containers.

Do not scatter bait on manure heaps or dispose of treated sacks/cardboard/fabric with manure. Clean up spillage promptly.

Before application remove animals and pets from the areas to be treated. Cover or remove any open food and water containers. Cover or remove (as applicable) fish ponds, aquariums etc. before application.

DIRECTIONS FOR USE

Use only as indicated

GENERAL INSTRUCTIONS

VECTOTHOR™ Fly Bait can be applied in many locations. Avoid cool or windy locations because flies prefer warm wind still sites for resting. For best results time applications to begin at the start of the season before fly populations have reached their peak. Fly control should be considered part of an integrated strategy which incorporates good sanitation, appropriate management of breeding sites (e.g. manure and other decaying organic matter) and exclusion measures for preventing access of flies into internal areas.

NOTE: This product is not attractive to all species of flies and control of non-target species may require other means of control.

Restraint: DO NOT place bait in areas accessible to food producing animals or pets.
