Bad news: Residues of both rat and mouse poisons are found in fish, foxes, barn owls and other non-target species the world over. They are also a threat to food safety, to the unborn child and are a persistent and cumulative danger to mammals.

Good news: By switching to using NARA® you are changing all this. At the same time legislation and industry standards are following your lead.

So many congratulations. You are contributing to a greener, more professional world centred around IPM-based pest management.

Also, thank you for working in professional pest control. **You are taking care of human health and food security, both vital for our environment and planet.** We are proud you use NARA® in your business. Thank you.

The world's renowned rodent experts, the largest service companies and industry associations believe that IPM means infrastructure improvements, hygiene, monitoring and trapping. The first vital first steps in pest management.

NARA® is seen as a pioneer with such organisations as **AIB, IFS, BRC** and **GMP**. They support the use of non-toxic rodent monitoring both inside and out, in all weathers and in over 50 countries worldwide.

We're proud of this and you should be too. To some people this might be a small contribution to conserving our planet, but we believe that the reduced use of poisons and accompanying digitization of our sector makes a significant difference.

Did you realise? Most of the profits from NARA® sales are re-invested into the research and development of **humane and digital solutions** designed to help pest managers work more efficiently and environmentally?

Our belief is that in the next decade our industry will focus on IPM, monitoring, approved humane traps, with digital cameras and sensors in every rodent box. We will move further and further away from 'poison'. We don't live in the 1970s, but in the 2020s.

ENG

NARA®BLOC is a high-tech, non-toxic monitoring block for rats and mice. • 100% allergen free • it lasts at least 3 months in any weather conditions from -20°C to +60°C indoors and outdoors. • Unlike conventional blocks, there will be neither insect infestation, nor mould nor decomposition due to moisture. **Ingredients:** Thermoplastic Elastomer (TPE), Aromas and Colorants. For further information, see product data sheet or www.nara-monitoring.com. NARA®BLOC is not effective for control methods. If rodent infestation is confirmed, control with suitable means must be carried out e.g. with approved humane traps by gorillatraps.com approved §18 IfSG. For manuals and information videos please look at our webshop www.futura-germany.com in the NARA Category. Professional use only.

FR

NARA®BLOC est un high-tech, bloc de monitoring non-toxique pour les rats et les souris. • 100% Allergène libre • garde au moins 3 mois • toutes les conditions météorologiques • de -20°C à +60°C • intérieure et extérieure • aucune infestation par les insectes comme dans des blocs classiques - pas de moisissure ou d'humidité dégradation sous forme de blocs imputrescibles. **Ingédients:** Thermoplastic Elastomer (TPE), Arôme, Colorants. NARA®BLOC ne convient pas au contrôle des rongeurs. En cas d'infestation par les rongeurs, veuillez utiliser des moyens appropriés, tels que des pièges, par exemple Pièges de Gorilla Traps certifiés par §18 IfSG. Pour plus d'informations et des instructions vidéo, voir la fiche technique du produit ou www.futura-germany.com. Usage professionnel seulement.
