Bad news: Residues of both rat and mouse poisons are found in fish, foxes, barn owls and other non-target species the world over. They are also a threat to food safety, to the unborn child and are a persistent and cumulative danger to mammals.

Good news: By switching to using NARA® you are changing all this. At the same time legislation and industry standards are following your lead.

So many congratulations. You are contributing to a greener, more professional world centred around IPM-based pest management.

Also, thank you for working in professional pest control. **You are taking care of human health and food security, both vital for our environment and planet.** We are proud you use NARA® in your business. Thank you.

The world's renowned rodent experts, the largest service companies and industry associations believe that IPM means infrastructure improvements, hygiene, monitoring and trapping. The first vital first steps in pest management.

NARA® is seen as a pioneer with such organisations as **AIB, IFS, BRC** and **GMP**. They support the use of non-toxic rodent monitoring both inside and out, in all weathers and in over 50 countries worldwide.

We're proud of this and you should be too. To some people this might be a small contribution to conserving our planet, but we believe that the reduced use of poisons and accompanying digitization of our sector makes a significant difference.

Did you realise? Most of the profits from NARA® sales are re-invested into the research and development of **humane and digital solutions** designed to help pest managers work more efficiently and environmentally?

Our belief is that in the next decade our industry will focus on IPM, monitoring, approved humane traps, with digital cameras and sensors in every rodent box. We will move further and further away from 'poison'. We don't live in the 1970s, but in the 2020s.

ENG

NARA®STIC is a synthetic high-tech, non-toxic monitoring tool for rats and mice. • 100% allergen-free • 'Dual Fit Technology' fits in Gorilla Traps mouse and rat traps as well as similar models • place in the unset trap for optimal and safe monitoring • it lasts at least 3 months in any weather conditions from -20°C to +60°C indoors and outdoors. • Unlike conventional blocks, there will be neither insect infestation, nor mould nor decomposition due to moisture. **Ingredients:** Thermoplastic Elastomer (TPE), Aromas and Colorants. For further information, see product data sheet or www.nara-monitoring.com. NARA®STIC is not effective for control methods. If rodent infestation is confirmed, control with suitable means must be carried out e.g. with approved humane traps by gorillatraps.com approved §18 IfSG. For manuals and information videos please look at our webshop www.futura-germany.com in the NARA Category. Professional use only.

FR

NARA®STIC est un outil synthétique de surveillance high-tech non toxique pour les rats et les souris. • 100% sans allergène • „Dual Fit Technology“ s'insère dans les pièges à Gorilla Traps souris et rat pièges ainsi que des modèles similaires • place dans le piège sans surveillance pour une surveillance optimale et sûre • dure au moins 3 mois • toutes les conditions météorologiques • de -20°C à +60°C • intérieur et extérieur • pas d'infestation par les insectes • pas de moisissure ni de décomposition due à l'humidité comme produits comparable. **Ingédients:** thermoplastic elastomer (TPE), Arôme, Colorants. NARA®STIC ne convient pas au contrôle des rongeurs. En cas d'infestation par les rongeurs, veuillez utiliser des moyens appropriés, tels que des pièges, par exemple Pièges de Gorilla Traps certifiés par §18 IfSG. Pour plus d'informations et des instructions vidéo, voir la fiche technique du produit ou www.futura-germany.com. Usage professionnel seulement.

DE
