

symterra pulse

BY AVITHOR™

A revolutionary technology that stops birds from landing on structures
IMMEDIATELY & PERMANENTLY

- ✔ Works on daytime navigating birds
- ✔ Over 10,000 units sold globally
- ✔ Safe & Humane
- ✔ The Future of Bird Control Technology

SYMTERRA PULSE CREATES A LOW-INTENSITY MAGNETIC WAVE WHICH DIRECTLY AFFECTS THE BIRD'S NAVIGATIONAL ABILITY. BIRDS WILL NOT LAND AND DIVERT ELSEWHERE. **FOREVER.**

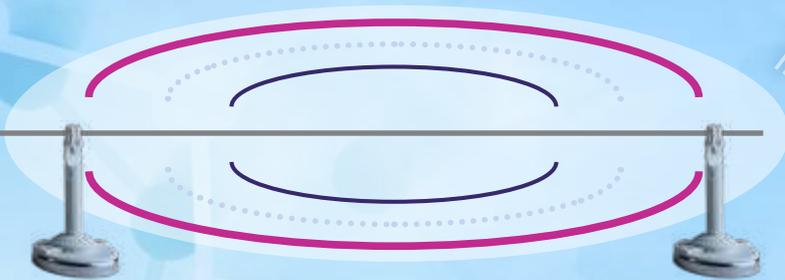

ENSYSTEX®
LEADING INNOVATION IN PEST MANAGEMENT

A SCIENTIFIC REVOLUTION

SYM TERRA PULSE, an innovative solution in bird control, was designed to address the challenges of bird infestations in a humane and effective way, utilising advanced science and intelligent mechanisms to safeguard your premises.

Conceived by a Quantum Physicist, and developed by experts in Ornithology and Entomology, SYM TERRA PULSE uses applied science to disrupt the migratory physiology of birds.

Birds are biologically optimised to navigate. There's a special protein in their eyes, mineral crystals in their beaks, and wave receptors in their ears, eyes, and brains. Together, these elements provide every bird with an "internal GPS." SYM TERRA PULSE emits an electromagnetic frequency that harmlessly disrupts that GPS. When in range, birds are temporarily unable to judge speed, direction, and distance. Discouraged from landing, the birds simply continue their search for a good place to roost, nest, or forage.

SYSTEM COVERAGE EACH SYM TERRA PULSE CAN COVER UP TO 180 LINEAR METRES

SYM TERRA PULSE consists of a Pulse Control Hub connected to an Emitter Line. Small, discreet holders secure the Emitter Line in place, ensuring it maintains the proper height and alignment for optimal performance. Supports are available in various heights to accommodate different installation requirements and surfaces. The Emitter Line creates an invisible, silent, low-intensity magnetic wave around the area where it is installed to deter the birds from approaching. For larger areas multiple Pulse Control Hubs can be used.

PERFECT FOR:

- Billboards
- Restaurants (large, local or chain)
- Manufacturing / Warehouses
- Food processing / Distribution / Handling
- Stadiums / Arenas / Venues
- Hotels / Hospitality / Destinations
- Pharmaceutical / Medical / Nursing
- Municipal / Industrial
- Affluent Homeowners

REAP THE MANY REWARDS OF THIS INNOVATIVE SOLUTION

The benefits of this innovative solution extend beyond bird deterrence. By effectively controlling bird populations, it helps prevent damage to structures, equipment, and vegetation, reduces health risks associated with birds and their droppings, and maintains a cleaner and safer environment, not to mention keeping the aesthetic of the structure intact.

SAFE & HUMANE

SYM TERRA PULSE does not emit problematic radio frequency (RF) nor ultrasound waves. It operates at 2,500 Volts AC at 0.021 amps, has a power consumption of 25 Watts and an output frequency in the audio frequency (AF) spectrum. This frequency is converted into an electromagnetic wave and is not audible or harmful in any way. It will never interfere with electrical systems, Wi-Fi, electronic communications or other systems. Birds and people should NEVER be harmed by SYM TERRA PULSE.

PROVEN HUMANE, GREEN & EFFECTIVE

SYM TERRA PULSE was studied by the highly rated University of Arizona's College of Agriculture and Life Sciences, Department of Entomology in conjunction with Oregon State University. Their published findings show virtually 100% efficacy for bird abatement while simultaneously doing NO harm to the birds. SYM TERRA PULSE is a 100% eco-friendly solution!

CERTIFICATION

SYM TERRA PULSE has obtained FCC, Industry of Canada, CE and UKCA compliance that validate its compliance with health and safety standards for safe operation around humans and electronic devices. SYM TERRA PULSE is registered under the Australian Electrical Equipment Safety System (EESS).

**2 Year
Manufacturer
Warranty**

INNOVATIVE BIRD CONTROL

STANDARD KIT COMPONENTS

- 1 x IP65 Pulse Control Hub
- 180 m Emitter Line
- 21 x Top supports
- 21 x Base supports
- 42 x Spacer supports
- 10 x L-shape supports
- 6 x Connectors for Branch Lines
- 3 x Branch Connectors
- 6 x Branch Caps

Optional
Field Tester

Optional Magnetic Base Supports available

Optional
Crimping Tool

**USED BY MANY
INTERNATIONAL BRANDS**
